

PROVENT 3" X 2" DOUBLE WYE FITTING

ALL MALE ENDS ON THIS FITTING

IMPORTANT NOTES

1. Most bathroom group layouts have a fixture opening on both sides of the stack.
2. This PVC 3" X 2" double wye fits in-between a 6" wall and a 12" rough water closet.
3. There is a enough space on the back of the fitting to cut off an extra 2" if necessary
4. A 22 degree PVC fitting will fit on the 2" branches and allow a great deal of swing to pick up various openings.
5. 45 degree or 60 degree fittings can also fit the male branch openings to swing to other fixture openings.

FUNCTION OF COMPONENT

This special double wye allows picking up two openings on the horizontal branch with both openings above the center line of the fitting.
