PROSEAL PLUG DEVICE

FOR 2 HR. GYPSUM WALLS

IMPORTANT NOTES:

- 1. Cut the Sleeve Coupling Pipe to extend a minimum of 1" beyond either side of the wall.
- 2. Cut a neat 2 3/4" hole through the drywall for a proper fit. Gaps up to 1/4" around sleeve can be filled with drywall cement.
- 3. The Sleeve Pipe can be anchored to the wall by solvent welding a Mounting Flange to one side and anchor to the wall through the holes in the flange or solvent welding Seal Rings on both sides of the wall. (See Drawing A-1012-F)
- 4. Pass the pipe through the Sleeve Coupling Pipe. Fill the void between the pipe and the sleeve with Firefill material.
- 5. Install proper size split ProSet Plugs on both sides of the wall.

NOTE: See drawing A-1004-A for installation instructions of Firefill material.
